

A TRANSPARENT REANALYSIS OF SELF-DESTRUCTIVE FEEDING

Yuxuan (Melody) Wang

Harvard University | yuxuan_wang@fas.harvard.edu

(8) a. Javanese rules in the old way

$n \rightarrow \emptyset / C _$

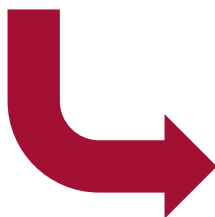

$h \rightarrow \emptyset / V _ V$

b. Javanese rules in the new way

$N \rightarrow n / V _ V$

$H \rightarrow h / _ \#$

default rules
always come later
(Kiparsky 1993),
so ...

UR	/omaH+Ne/	UR	/omaH+Ne/
$N \rightarrow n / V _ V$		$H \rightarrow h / _ \#$	
$H \rightarrow h / _ \#$		$N \rightarrow n / V _ V$	
$N \rightarrow \emptyset$	omaHe	$H \rightarrow \emptyset$	omaNe
$H \rightarrow \emptyset$	omae	$N \rightarrow \emptyset$	omae
SF	[omae]	SF	[omae]

Breaking!!!

- The relative order between the rules specifying N and H does not matter anymore.
- They don't interact!
- **We no longer need SDF!**
